PROFESSIONAL SUMMARY

Full-stack and DevOps engineer with years of experience building, deploying, and maintaining production web applications. Comfortable taking projects from empty repo to live URL — schema design, API development, frontend, cloud deployment, and CI/CD automation. Skilled at integrating AI capabilities into web platforms and shaping cloud-native systems that scale reliably under real traffic. Focused on building software that's easy to deploy, easy to maintain, and dependable in production. Strong async communicator, available for remote roles and long-term contracts.

SKILLS

Languages & Frameworks: PHP (Laravel) · JavaScript / TypeScript (Next.js, React, Vue.js, Tailwind) · Python (Django, automation, scripting) · C# · ABAP · Bash · HTML5 · CSS3 · REST API design

Databases: PostgreSQL · MySQL · Oracle · SQL

Cloud & DevOps: AWS (EC2) · Docker · Nginx · Cloudflare · Linux / Ubuntu · Git / GitHub · CI/CD (GitHub Actions, GitLab CI) · Server administration · Deployment automation

AI Integration: OpenAI · Anthropic (Claude) · Google Gemini & AI Studio · LLM API integration · Prompt engineering

Enterprise & IT Operations: SAP · ABAP development · Power BI · ERP · EMS · Network & hardware troubleshooting · IT support

Soft Skills: Async remote communication · End-to-end project ownership · Technical documentation · Cross-functional collaboration

PROFESSIONAL EXPERIENCE

FAUJI CEMENT COMPANY LIMITED — *Management Trainee Officer* Nov 2024 – Present

- Built **FCCMS (Fauji Cement Colony Management System)** end-to-end as sole developer — a housing society platform covering resident records, repair & maintenance, inventory, and complaint workflows. Stack: Laravel, Next.js, TypeScript. Owned schema, APIs, frontend, and deployment.
- Wrote Python automation tools to fast-track daily IT tasks, including a network scanner and a remote installer for endpoint software deployment.
- Supported IT operations: EMS, ERP, network and hardware troubleshooting.

CAPREGSOFT — *Software Engineer* Jun 2022 – Sep 2024

- Architected and developed full-stack web applications across the SDLC — designing relational database schemas, building Laravel and Django REST APIs, and integrating responsive React/Next.js frontends with TypeScript, MySQL, and PostgreSQL.
- Delivered production features through Git-based version control, peer code review, and agile sprint cycles, applying object-oriented design, performance optimization, and CI/CD practices in collaboration with cross-functional teams.

FREELANCE — *Full-Stack & DevOps Engineer* Jan 2021 – Present

Independent remote work via Upwork, Fiverr, and direct local clients.

- Engineered and shipped end-to-end full-stack web applications for international and local clients — building React/Next.js frontends with TypeScript, REST APIs in Laravel and Django, and handling database design, cloud deployment, and post-launch maintenance.
- Delivered task-based customization, feature development, and bug fixes across existing client codebases — including contract engagements with Panther Tech — with a focus on reliability, performance, and clean handoffs.
- Shipped production-ready AI integrations across client web applications — engineering LLM-powered features, conversational interfaces, and prompt-engineered automation flows with OpenAI, Anthropic Claude, and Google Gemini APIs.

LINKNB1T — *Software Engineer* Aug 2020 – Mar 2022

- Started as a PHP intern and promoted to Software Engineer within the first month based on rapid skill acquisition; engineered and maintained Laravel applications backed by MySQL, building dynamic, real-time interfaces with Laravel Livewire and AJAX-driven workflows.

EDUCATION & CREDENTIALS

COMSATS University Islamabad — *Bachelor of Science in Computer Science* Sep 2018 – Jun 2023

Amal Academy Career-Prep Fellow (Stanford-funded) Dec 2021 – Feb 2022

Selected from 4,500+ applicants for a 150-hour program in communication, leadership, and problem-solving.
